PRESENTED TO

Shubham Kumbhalkar

For mentoring and judging at HackMIT, from September 19th to September 20th

Sanjith

Sanjith Udupa
HackMIT 2026 Co-Director

To Whom It May Concern,

On behalf of the HackMIT organizing team, I am writing to express our deepest appreciation for Shubham Kumbhalkar's participation as a mentor and judge during HackMIT 2026, held at the Massachusetts Institute of Technology on September 19th-20th. HackMIT is one of the largest and most competitive hackathons globally, attracting over 1,000 talented students from 200+ colleges and universities across the world. The success of our event is made possible by the dedication of individuals like Shubham Kumbhalkar, whose expertise and involvement were invaluable.

We select mentors and judges based on their technical proficiency, prior hackathon experience, and ability to guide projects under time constraints. Shubham exemplified these qualities throughout the event. Specifically, they contributed by mentoring and judging teams across technical domains, where they provided thoughtful feedback and guided project execution and feasibility. Their ability to guide ideas and communicate constructive insights played an important role in supporting participants and shaping the final outcomes.

The feedback and support provided by Shubham significantly enriched the experience for all participants, pushing them to think critically and further develop their projects beyond HackMIT. Mentors and judges like Shubham are essential to fostering creativity, collaboration, and technical excellence among future innovators.

For further information, please feel free to reach out to our team at help@hackmit.org or visit our website at <https://hackmit.org>.

Sincerely,
Sanjith Udupa
HackMIT 2026 Co-Director
Massachusetts Institute of Technology
